SO-NEWS #8 *09/2021*

After a sunny summer, all the SORHEA is happy to see you again for the last quarter of 2021.

We hope that your autumn will not be rainy and dull but **successful and rich of beautiful security projects!**

For now, discover in SO-NEWS #8, the latest news from SORHEA.
And for more information, please visit our website, in the News section or contact your sales manager.

TRADE FAIRS

SORHEA is back on the international trade fair scene!

➡ From 7th-9th September, we took part in **The Security Event** in Birmingham (England), with TDSI, also member of the Vitaprotech group.

➡ In France, we participated in Préventica Lille from 28th – 30th September, with TIL TECHNOLOGIES, another member of the Vitaprotech group.

➡ And we will also be present at the Sicherheits Expo in Munich (Germany) from 24th – 25th November. SORHEA hopes to meet you in person at this event to present to you our latest technologies and software, SO-MAP and SMART BRIDGE.

WEBINAR

Do you want to know more about our latest software SO-MAP and SORHEA's integration solutions?

Register now for our webinar session dedicated to our alarm exploitation software:

Wednesday 13th October at 9:30 AM (Paris time)

Discuss in live for 30 minutes with two SORHEA experts:
> **Benjamin Tate**, Head of International Sales
> **Jonathan Blais**, Product Manager

A great opportunity for you to ask them all your questions about our integration and alarm exploitation solutions.

SOLARIS & GIT SECURITY AWARD 2022

And our SOLARIS, our famous autonomous infrared barrier, is the winner of the GIT SECURITY AWARD 2022!

Every year, the international GIT SECURITY International (Magazine for Safety and security) selects the most successful solutions in the safety and security market.

From a selection of products, this award recognises those offering the best innovations and features on the market.

 A great illustration of the quality and performance of SORHEA's products!

REALISATION

Securing an electricity distribution site (Elia) in Belgium

In the municipality of Londerzeel in Belgium, a **high-voltage Electricity Distribution Site** wanted to installa perimeter security system. Besides the **danger of electrocution** from the transformer, the customer wanted to prevent **material damage or theft.**

After a complete site survey, our teams recommended the installation of the **SOLARIS autonomous active infrared barriers.** 4 columns of 3 meters in height and 8 cells per direction were installed, to meet all the customer's requirements.

In addition to the supply of SORHEA products, our **Systems Integrator Partner was provided on-site Commissioning Assistance by our technicians.**
