

SORHEA
VEHICLE FLEET

G-FENCE 600

A vehicle fleet wishes to protect its park of vehicles (sedan types) in order to avoid any damage (theft of spare parts, damage to the bodywork ...)

CONSTRAINTS TO CONSIDER

The entire surface of the vehicle fleet is exploited. There is very little space to devote to perimeter protection. The solutions proposed must therefore have a very small footprint in order to conserve as much space as possible for the storage of vehicles

Key figures

200 m
of secure perimeter

1/2
day of
installation

OUR SOLUTIONS

- **Shock detection cable : G-FENCE 600**

On an existing fence in order to detect any attempt to cut, tear off, climb or cross over.
