

SO-NEWS #5 03/2021

Enjoy the Spring edition of **SO-NEWS**, a wrap-up of the latest news from SORHEA.

For more information, please visit our [website](#), in the [News section](#) or [contact your sales manager](#).

NEW PRODUCT

G-FENCE 2400 : Performance at the core of innovation

With our new shock detection cable G-FENCE 2400, you benefit from the very best of our shock detection technology. For the exploitation of the alarms, **get a head start by selecting which communication mode best suits.**

G-FENCE 2400 is MAXIBUS compatible, so **ideal for multi-technology sites** as it can be associated to the MAXIRIS, PIRAMID and MI8 network. Direct integration with VMS is possible via Modbus or API. Its **remote management options** (configuration, maintenance and software updates) also make the G-FENCE 2400 an ideal solution for reducing intervention costs.

Discover in a few days time, the new G-FENCE 2400 and our updated [range of shock detection cables](#).

WEBINAR

Did you like our first Webinar?

On the 25th of March, our **Head of International Sales Benjamin Tate** presented our business and security solutions, with a specific focus on active infrared technology.

To stay up-to-date with our upcoming webinars, follow us on [our LinkedIn page](#) or check out [the news section on our website](#).

New sessions with new topics are coming soon: stay tuned!

TRADE FAIR APPOINTMENTS

Despite the context that forces many trade fairs to be rescheduled, our teams are working hard to keep in touch with you.

Following the opening of our German subsidiary, SORHEA will be present at the **Sicherheits Expo** trade fair on 23 and 24 June in Munich.

We will also be taking part in the **Windays virtual trade fair from 7 to 9 June** to present SORHEA, its products and innovations.

Finally, SORHEA is hitting the autobahn in Germany to meet our customers during the **SORHEA ON TOUR in June and October 2021**.

We look forward to seeing you!

PRODUCT DEMONSTRATION

Our showroom comes to you!

Thanks to the tools they have at their disposal, our sales force is mobilised to present our security solutions to you in the best possible way. **Thanks to a tailor-made suitcase, you can attend a real demonstration of our products.**

For example, the G-FENCE demo case presents our Shock Detection Cable. **You can install and test the product functionality on your fence in real time.**

SECURITY

At SORHEA, the key word is security. To guarantee our employees and partners safety and to ensure the safe shipment and reception of our materials, a brand new loading bay has been built at our factory in Vaulx-en-Velin.

Before the works:

Our shipping platform was a looking a little tired and used.

After the works:

Safety barriers have been placed around the stairs, a platform bridge has been installed and a wheel guidance and blocking system now allows drivers to make safer manoeuvres.

Thanks to these installations, we eliminate the risk of accidents that can occur during loading procedures. This way, we protect the personnel involved by significantly reducing the risk of musculoskeletal disorders.

Read more about the safety work carried out in our buildings on our LinkedIn page:

Our #SECURITY post

On the 8th of February, the VITAPROTECH group strengthened its presence in the video detection and protection market with the acquisition of ESI.

As Europe's leading provider of software solutions for remote monitoring, video protection, remote assistance and lift call stations, ESI uses its years of experience and industry knowledge to provide its customers the best technology.

This acquisition, the 5th made by Vitaprotech since 2018, confirms the group's position as a leader in securing professional sites.
