## # VOTE FOR SOLARIS

### SOLARIS, GIT Security Award 2022 finalist

We are pleased to announce that SOLARIS, our high performance autonomous active infrared barrier, is in the final of the GIT-SECURITY Award 2022 in the category D "Access Control, Intruder Alarm, Perimeter Protection".

Now it's your turn to choose your favourite security solution: if you want to support SORHEA and our autonomous active infrared barrier, don't hesitate to vote for SOLARIS!

*(votes are open until 23 August 2021)*

## # G-FENCE 2400

On the 1st of June, we launched our new shock detection cable:  
**The G-FENCE 2400 is now available for order.**

G-FENCE 2400 is a shock detection cable that combines **reliable detection with ease of installation and updating (all remotely)**.

There is also the possibility to choose from 3 different transmission modes; dry contacts, BUS output to our MAXIBUS Universal and also Modbus / API output."

# # SECURING PENITENTIARIES

In our mission to secure sensitive sites in France, we work closely with the APIJ (Agence Publique pour l'Immobilier de la Justice), the DAP (Direction de l'Administration pénitentiaire) and the DISP (Direction interrégionale des services pénitentiaires) to **secure new projects and update existing security systems.**

**Our APIRIS triple technology barrier is certified and has been installed in many prisons in France, where 80% of prisons are secured with our products.**

**SORHEA has also equipped many prisons around the world:** in Switzerland, Germany, Belgium, The Netherlands, Denmark, The Czech Republic, Uruguay, USA and Poland.

**Most recently, for a project in Mexico,** we are proud to have delivered 46 APIRIS columns, 137 PIRAMID detectors, 22 MAXIRIS infrared columns and 3km of G-FENCE 3000 cable.

**This project was carried out with another VITAPROTECH company:** since the integration was performed with the Micro-Sesame software from TIL Technologies.

After several months of on-site and remote support, the products are being installed.
