

SO-NEWS #7 07/2021

Discover now the latest SO-NEWS and all the news from SORHEA! Our teams remain at your service all summer long ☐

For more information, please visit our [website](#), in the [News](#) section or [contact your sales manager](#).

## # NEW PRODUCT

Every day, SORHEA works to meet your needs in terms of perimeter detection and today we go one step further:

**We are proud to announce the upcoming release of our brand new alarm exploitation software SO-MAP !**

With SO-MAP, our experts wanted to offer you a complete security solution, from intruder detection to alarm information processing.

This simple and intuitive software offers **advanced functionalities for efficient security**: easy alarm recognition with video, real-time visualisation, efficient operation...

For more information on SO-MAP and a preview of the software, visit our website:

[More information about SO-MAP](#)

**SAVE THE DATE !** Don't miss the launch of SO-MAP, which will be available for order on **7 September**. In the meantime, you can already contact your [sales representative](#) for more information.

## # TEAM-BUILDING DAY AT SORHEA

To enjoy the few sunny days at the beginning of July, SORHEA employees met at the Vaulx-en-Velin headquarters for a **#Team-Building day around the traditional barbecue**.

After sharing a convivial meal during which they celebrated the summer and the year's successes, the employees took part in a pétanque tournament, **under the sign of happiness and company cohesion!**

## # LIGHTS, CAMERA, ACTION!

**SORHEA TUTORIALS ☐**, a new tool to assist you during your security projects

As the perimeter detection expert, SORHEA develops the most efficient tools to support you throughout your security projects. At the moment, our teams are producing **technical videos** to make it easier for you to **install and configure our products** and to provide all the information you need for an optimal operation.

Make sure you follow us on LinkedIn so you don't miss the release of the first SORHEA TUTORIALS!

## # NEW PRODUCTION LINE

**A few months ago, SORHEA inaugurated a new production line at its production facility!**

SORHEA has integrated the production of electric fence systems and detection panels and outrigger detectors.

It is now our Industrialisation and Production department that manufactures SILUR, SI-TOP, SI-LOCK, ACTI-TOP and ACTI-FENCE products in Vaulx-en-Velin (Rhône, France).

And to ensure the best pre-sales and after-sales service, **a team of experts dedicated to these ranges is at your disposal all year long.**

If you have any needs or questions, do not hesitate to contact your sales representative.

## # REALISATION G-FENCE 2400

**We are proud to present our first security project with our G-FENCE 2400 shock detection cable :**

**The Olympic Works site, where the equipment for the 2024 Olympic Games in Paris will be stored, is now secured with 400m of G-FENCE 2400 cable.**

Due to the site constraints (few power points, different mounting brackets, remote management...), the G-FENCE 2400 is the most suitable solution and perfectly meets the customer's needs.

**The many features of our shock detection cable make it a perfect security solution for all types of sites.**
