

Public works company

## PIRAMID

The head office of a public works company called on SORHEA to set up an intrusion detection system to protect the parking lot of its employees against theft and vandalism.

### CONSTRAINTS TO TAKE INTO ACCOUNT

- Very limited customer budget
- Effective solution that must be installed on the facade of the establishment
- Solution adapted to a coupling with removal of doubt

## Key figures

for installation

### OUR SOLUTIONS

In order to meet customer needs, our teams recommended the installation of a high performance volumetric intrusion detection system.

- **The chosen solution is PIRAMID.** These dual-technology detectors are very easy to configure via a secure application on a smartphone or tablet. Thanks to the UNIVERSAL MAXIBUS installed on site, configuration is simplified and possible remotely because the establishment manages the site by remote monitoring. The coupling with cameras which ensure the resolution of video doubts reinforces the detection solution.
