PROOF OF QUALITY

**BUREAU
VERITAS**

We are proud to announce that at the beginning of 2022, our ISO 9001 and 45001 certifications have been renewed.

These certifications guarantee the safety and quality of our products and services.

ISO 9001 guarantees customer-oriented management and the commitment of the management to continuous improvement.

ISO 45001 guarantees the safety of the company's employees and the absence of risks in the workplace.

→ **By providing optimal working conditions, we make it possible for our teams to be 100% committed to your projects.**

INTERNATIONAL EVENTS

From 16 to 18 January, SORHEA was present at the Intersec exhibition in Dubai, alongside TDSi, one of the leading suppliers of integrated access control systems which is also a member of the VITAPROTECH group.

Our experts used the opportunity to present our infrared barriers, shock detection cables, dual technology detectors and integration solutions.

A look back at the event

And we are pleased to announce that we will participate in WINDAYS for the second time, from 15th to 17th February.

During 3 days, join us online to discover our products and technologies.

Our German team will be delighted to present you our solutions and services and discuss your security projects.

→ And our DACH Sales rep Heiko Viehweger will also lead a workshop named "Perimeter Protection - Challenges in identifying threats".

BUSINESS CASE

As a leader in perimeter protection, SORHEA secures many famous and sensitive sites around the world. In France, for example, we secure the production facilities of well-known French companies in the luxury sector.

This production site in the center of France made use of an extension to update its security system.

We upgraded the old MAXIRIS 2000 infrared barriers to MAXIRIS 3100 so that the site could benefit from the latest product innovations, such as the latest generation NCIS cells.

To increase protection, G-FENCE 2400 shock detection cable was also installed on the site's perimeter fence.
